-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gundersen (6,257,170) in view of Goldman (3,095,852). Gundersen shows a system for cultivating animals 30 having at least one container 21 having a floor 82 and sidewalls 84 extending upward therefrom and forming the interior of the container 21. Gundersen does not teach a feed collection area. Goldman shows a feed collection area 44 within a container 62 supporting feed for animals and having a means 48 operatively connected 64 to the container 62 for moving feed particles within the feed collection area 44. Air is discharged from air opening 58 to move feed particles on a perforated cover 45, the air coming from an air supply source. With respect to claims 1 and 10, to use the feed container of Goldman with the container system of Gundersen would have been obvious to one skilled in the art in order to provide a specific location for the animal's feed so that the feed does not get scattered about the container which would involve more frequent cleaning to keep the container sanitary.

Allowable Subject Matter

Claims 3-8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9, 13-17 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference are: Fillion (4,027,627), Malestien (4,697,547), Momont et al (5,150,666), Tracy (6,314,910), and Patterson et al (6,571,736).
